- Applied quick problem-solving skills to the technical issues arising in the project.
- Implemented excellent debugging skills to track down complex issues in the project.
- Worked with issues in front end scripting using web services tools.
- Experienced in working in teams collaboratively and in fast paced environment

UNIVERSITY LEVEL EXPERIENCE

Office of Technology Services, Illinois Institute of Technology
Support Desk Technician (Level 1)

July 2017 – Present

PROJECTS

- **Enterprise Web Applications**
 - ♦ Developed e-commerce and car rental web applications using Servlets, MySQL, MongoDB, Javascript, HTML, CSS
- **Cloud computing**
 - ♦ Developed programs in C, Java for Benchmarking of memory/CPU performance, TeraSort using Hadoop and Spark using Amazon AWS.
- **Big Data**
 - ♦ Executed various commands in Hadoop, Spark, Pig Latin environments using Microsoft Azure
- **Database Organization**
 - ♦ Developed a database engine using C programming

- **Mobile Application Development (Android)**
 - ♦ Developed applications in android like Stock Market Watch, News Gateway Application and Know Your Government application listing information about government officials in users current or requested location. Comfortable with Fragments, AsyncTasks, Views etc.
- **JDBC programming**
 - ♦ Well versed in JDBC programming and developed many small applications in JAVA.
- **Websites**
 - ♦ Developed user friendly interactive websites using HTML, CSS, JQuery, PHP and Javascript.
